

Keyboard Shortcuts

We've added some helpful shortcuts so you can spend less time clicking buttons and more time analyzing data.

Update Element Status

To manually change the status of elements in Avvir, select the item and utilize the keyboard shortcuts below:

- **C** - Clash
- **V** - Deviated
- **B** - Built
- **N** - Not built

Control Visibility of Elements by Status

To adjust the visibility of elements by their status, you can toggle on and off the filter chips, or enter the corresponding keyboard shortcuts below:

Image Filter Chips on Avvir

- **shift+C** - Clash ON/OFF
- **shift+V** - Deviated ON/OFF
- **shift+B** - Built ON/OFF
- **shift+N** - Not built ON/OFF

Reviewing Deviations List:

To 'accept or approve' deviations, you can make use of our Push to BIM Feature. This allows you to write the As-Built location to an As-Built IFC file available for direct download throughout the project.

- **P** = Push to BIM

Other Helpful Shortcuts:

When navigating through the Explorer mode, you may find the following useful:

- **X** = Hide Element
- **H** = Return to Home View
